

CAT 2026 – Year Overview & Psychological Context (Mentor Brief)

Candidate: Sahil

CAT 2025 Result: 90.08 percentile

Primary Goal: CAT 2026 – 99+ percentile with financial independence

Psychological State:

High potential, execution-inconsistent historically due to fear of average identity and overthinking. Currently realistic, receptive to discipline, but requires strict external structure. Flexibility causes drift; firm accountability produces results.

Phase 1 (Dec 2025 – May 2026): Stability & Identity Repair

- Video editing skill for income: 6–8 hrs/day
- Target income: ■30k–50k/month
- CAT prep: 1.5–2 hrs/day (maintenance only)

Phase 2 (Jun 2026 – Aug 2026): CAT Ramp-Up

- Video editing: 3–4 hrs/day
- CAT prep: 4–5 hrs/day
- Begin structured mocks and analysis

Phase 3 (Sep 2026 – Nov 2026): CAT Peak Phase

- CAT prep: 6–8 hrs/day
- Editing: 2 hrs/day maintenance
- Focus on mock refinement and temperament

Mentor Style Required:

Firm, non-bending, output-focused. No motivational talk, only targets and accountability. Treat as professional trainee.

Coordination Model:

- Execution Mentor: daily discipline, income skill, structure
- CAT Mentor: academic strategy, mocks, percentile planning

Note:

CAT 2025 result is a reality anchor, not failure. With structure and consistency, CAT 2026 rebound is realistic.
