Questions

Instructions

Answer the questions based on the following information. The amount of money invested (rupees in crores) in the core infrastructure areas of two districts, Chittoor and Khammam, Andhra Pradesh, is as follows.

	Chittoor district			Khammam District	
Core Area	1995	1996	Core area	1995	1996
Electricity	815.2	1054.2	Electricity	2065.8	2365.1
Chemical	389.5	476.7	Chemical	745.3	986.4
Thermal	632.4	565.9	Thermal	1232.7	1026.3
Solar	468.1	589.6	Solar	1363.5	1792.1
Nuclear	617.9	803.1	Nuclear	1674.3	2182.1
Total	2923.1	3489.5	Total	7081.6	8352

Question 1

The investment in electricity and thermal energy in 1995 in these two districts formed what per cent of the total investment made in that year?

- A 41%
- B 47%
- C 52%
- D 55%

[VIEW SOLUTION](#)

Question 2

If the total investment in Khammam shows the same rate of increase in 1997, as it had shown from 1995 to 1996, what approximately would be the total investment in Khammam in 1997?

- A Rs. 9,850 crore
- B Rs. 10,020 crore
- C Rs. 9,170 crore
- D Rs. 8,540 crore

[VIEW SOLUTION](#)

Question 3

In Khammam district, the investment in which area in 1996 showed the highest percentage increase over the investment in that area in 1995?

- A Electricity
- B Chemical
- C Solar
- D Nuclear

Question 4

By what per cent was the total investment in the two districts more in 1996 as compared to 1995?

- A 14%
- B 21%
- C 24%
- D 18%

Question 5

Approximately how many times was the total investment in Chittoor to the total investment in Khammam?

- A 2.8
- B 2
- C 2.4
- D 1.7

Total	930								906		

One of the functions of the Reserve Bank of India is to mobilize funds for the Government of India by issuing securities. The following table shows details of funds mobilized during the period July 2002 - July 2003. Notice that on each date there were two rounds of issues, each with a different maturity.

Question 6

Which of the following statements is NOT true?

- A Competitive bids received always exceed non-competitive bids received.
- B The number of competitive bids accepted does not always exceed the number of non-competitive bids accepted.
- C The value of competitive bids accepted on any particular date is never higher for higher maturity.
- D The value of non-competitive bids accepted in the first round is always greater than that in the second round.

[VIEW SOLUTION](#)

Question 7

Which of the following is true?

- A The second round issues have a higher maturity than the first round for all dates.
- B The second round issue of any date has a lower maturity only when the first round notified amount exceeds that of the second round.
- C On at least one occasion, the second round issue having lower maturity received a higher number of competitive bids.
- D None of the above three statements is true.

[VIEW SOLUTION](#)

Question 8

How many times was the issue of securities under-subscribed, i.e., how often did the total amount mobilized fall short of the amount notified?

- A 0
- B 1
- C 2
- D 3

[VIEW SOLUTION](#)

Instructions

DIRECTIONS for the following three questions: Answer the questions on the basis of the information given below.

Spam that enters our electronic mailboxes can be classified under several spam heads. The following table shows the distribution of such spam worldwide over time. The total number of spam emails received during December 2002 was larger than the number received in June 2003. The total number of spam emails received during September 2002 was larger than the number received in March 2003. The figures in the table represent the percentage of all spam emails received during that period, falling into those respective categories.

Category	Sep-02	Dec-02	Mar-03	Jun-03
Adult	38	33	19	17
Financial	25	30	37	45
Health	11	19	5	18
Internet	5	3	10	6
Products	3	7	10	11
Scams	5	6	11	2
Others	13	2	8	1

Question 9

In the health category, the number of spam emails received in December 2002 as compared to June 2003.

- A was larger
- B was smaller
- C was equal
- D cannot be determined

[VIEW SOLUTION](#)

Question 10

In the financial category, the number of spam emails received in September 2002 as compared to March 2003.

- A was larger
- B was smaller
- C was equal
- D cannot be determined

[VIEW SOLUTION](#)

Question 11

In which category was the percentage of spam emails increasing but at a decreasing rate?

- A Financial
- B Scams
- C Products
- D None of the above

Directions for the next 4 questions: Answer these questions based on the table below:

The table shows trends in external transactions of Indian corporate sector during the period 1993-94 to 1997-98. In addition, following definitions hold good:

Sales, Imports, and Exports, respectively denote the sales, imports and exports in year i .

Deficit in year i , Deficit $_i$ = Imports - Exports

Deficit Intensity in year i , DI = Deficit/Sales Growth rate of deficit intensity in year i , $GDI = \frac{DI_i - DI_{i-1}}{DI_{i-1}}$

Further, note that all imports are classified as either raw material or capital goods.

Trends in External Transactions of Indian Corporate Sector (All figures in %)

Year	1997-98	1996-97	1995-96	1994-95	1993-94
Export Intensity*	9.2	8.2	7.9	7.5	7.3
Import Intensity*	14.2	16.2	15.5	13.8	12.4
Imported raw material/total cost of raw material	20.2	19.2	17.6	16.3	16
Imported capital goods/Gross fixed assets	17.6	9.8	11.8	16.3	19.5

*Ratio of exports (or imports) to sales

Question 12

Which of the following statements can be inferred to be true from the given data?

- A During the 5 year period between 1993-94 and 1997-98, exports have increased every year.
- B During the 5 year period between 1993-94 and 1997-98, imports have decreased every year.
- C Deficit in 1997-98 was lower than that in 1993-94.
- D Deficit intensity has increased every year between 1993-94 and 1996-97.

CAT Syllabus PDF

Question 13

In 1997-98 the total cost of raw materials is estimated as 50% of sales of that year. The turn over of Gross fixed assets, defined as the ratio of sales to Gross fixed assets, in 1997-98 is, approximately;

- A 3.3
- B 4.3
- C 0.33
- D not possible to determine

[VIEW SOLUTION](#)**Question 14**

The highest growth rate in deficit intensity was recorded in:

- A 1994-95
- B 1995-96
- C 1996-97
- D 1997-98

[VIEW SOLUTION](#)**Question 15**

The value of the highest growth rate in deficit intensity is approximately:

- A 8.45%
- B 2.15%
- C 33.3%
- D 23.5%

Directions for the next 5 questions: Answer the questions with reference to the table given below: Information Technology Industry in India (Figures are in million US dollars)

	1994-95	1995-96	1996-97	1997-98	1998-99
Software:					
Domestic	350	490	670	950	1250
Exports	485	734	1083	1750	2650
Hardware:					
Domestic	590	1037	1050	1205	1026
Exports	177	35	286	201	4
Peripherals:					
Domestic	148	196	181	229	329
Exports	6	6	14	19	18
Training	107	143	185	263	302
Maintenance	142	172	182	221	236
Networking and others	36	73	156	193	237
Total	2041	2886	3807	5031	6052

Question 16

The highest percentage growth in the total IT business, relative to the previous year was achieved in:

- A 1995-96
- B 1996-97
- C 1997-98
- D 1998-99

[VIEW SOLUTION](#)

Question 17

Additional instructions:

For any activity A, year X dominates years Y if IT business in activity A, in the year X, is greater than the IT business, in activity A, in the year Y. For any two IT business activities, A & B, year X dominates year Y if:

- a) The IT business in activity A, in the year X, is greater than or equal to the IT business, in activity A in the year Y,
- b) The IT business in activity B, in the year X, is greater than or equal to the IT business in activity B in the year Y and
- c) There should be strict inequality in the case of at least one activity.

For the IT hardware business activity, which one of the following is not true?

- A 1997-98 dominates 1996-97
- B 1997-98 dominates 1995-96
- C 1995-96 dominates 1998-99
- D 1998-99 dominates 1996-97

[VIEW SOLUTION](#)

Question 18

The total annual exports lay between 35 and 40 percent of the total annual business of the IT industry, in the years:

- A 1997-98 & 1994-95
- B 1996-97 & 1997-98
- C 1996-97 & 1998-99
- D 1996-97 & 1994-95

Question 19

Which one of the following statements is correct?

- A** The annual software exports steadily increased but annual hardware exports steadily declined during 1994-1999.
- B** The annual peripheral exports steadily increased during 1994-1999.
- C** The IT business in training during 1994- 1999 was higher than the total IT business in maintenance during the same period.
- D** None of the above statements is true.

[VIEW SOLUTION](#)

Question 20

Additional instructions:

For any activity A, year X dominates years Y if IT business in activity A, in the year X, is greater than the IT business, in activity A, in the year Y. For any two IT business activities, A & B, year X dominates year Y if:

- a) The IT business in activity A, in the year X, is greater than or equal to the IT business, in activity A in the year Y,
- b) The IT business in activity B, in the year X, is greater than or equal to the IT business in activity B in the year Y and
- c) There should be strict inequality in the case of at least one activity.

For the two IT business activities, hardware and peripherals, which one of the following is true?

- A** 1996-97 dominates 1995-96
- B** 1998-99 dominates 1995-96
- C** 1997-98 dominates 1998-99
- D** None of these

The following table gives the national income and the population of a country for the years 1984 – 85 to 1989 – 90. For each of the following questions choose the best alternative:

Year	National Income (in Rs. crore)	Population (in crore)
1984-85	229,225	74
1985-86	261,174	75
1986-87	291,556	77
1987-88	329,934	78.5
1988-89	388,539	80
1989-90	433,500	81.2

Question 21

The per capita income is highest for the year :

- A** 1984-85
- B** 1985-86
- C** 1987-88
- D** 1989-90

[VIEW SOLUTION](#)

CAT Percentile Predictor

Question 22

Increase in the per capita income compared to the previous year among the years given below was highest for the year:

- A 1985-86
- B 1986-87
- C 1987-88
- D 1988-89

[VIEW SOLUTION](#)

Question 23

The difference between the percentage increase in per capita income and the percentage increase in the population compared to the previous year is highest for the year:

- A 1985-86
- B 1986-87
- C 1987-88
- D 1988-89

[VIEW SOLUTION](#)

Question 24

The rate of increase in population was lowest in the year:

- A 1985-86
- B 1987-88
- C 1989-90
- D None of these

[VIEW SOLUTION](#)

CAT Score Calculator

Question 25

The increase in the per capita income compared to the previous year is lowest for the year :

- A 1985-86
- B 1986-87
- C 1987-88
- D 1989-90

The following table gives the tariff [in paise per kilo-watt-hour (kWh)] levied by the UPSEB in 1994-95, in four sectors and the regions within them. The table also gives the percentage change in the tariff as compared to 1991-92.

	Region 1		Region 2		Region 3		Region 4		Region 5	
	P/kWh	%	P/kWh	% incr.	P/kWh	%incr.	P/kWh	% incr.	P/kWh	% incr.
Sector 1	425	15	472	5	420	-4	415	8	440	10
Sector 2	430	12	468	8	448	7	423	-3	427	11
Sector 3	428	8	478	-4	432	6	441	10	439	8
Sector 4	434	-5	470	15	456	10	451	12	446	-12

Question 31

In 1994-95, if there was 10% decrease in the domestic consumption of power as compared to that in 1991-92, what was the consumption of power in the rural sector in 1991-92?

- A 1,312 megawatts
- B 1,422 megawatts
- C 1,750 megawatts
- D Cannot be determined

[VIEW SOLUTION](#)

Question 32

If the amount of power consumed by the various regions in sector 1 is the same, then as compared to 1991-92 the net tariff in 1994-95

- A increased by 6.5%
- B decreased by 3.5%
- C increased by 10.2%
- D decreased by 7.3%

[VIEW SOLUTION](#)

Question 33

Which of the following statements is true?

- A The average tariff in region 4 is 437.5 p/kWh
- B The average tariff in region 2 is greater than the average tariff in region 5
- C In 1991-92, the industrial sector contributed to about 42% of the total revenue from power
- D None of these

The table given below gives the annual details of loans from rural banks and agricultural loans over the years 1970 to 1983. Using this data answer the questions that follow.

Year	Loan from Rural			Agricultural Loans		
	No. of rural banks	Avg. no. of loans	Average size (in Rs.)	No. ('000)	Value (Rs. In millions)	Consumer Price Index
1970	90	28	109	18.3	2	43
1971	115	39	133	20.4	3.58	49
1972	130	52	178	25.1	6.26	55
1974	260	98	243	41.2	34.54	70
1975	318	121	283	51.4	52.21	78
1980	605	288	567	135.7	498.4	131
1981	665	312	622	152.8	612.4	137
1983	840	380	711	211.6	915.7	149

Question 36

If the consumer price index for 1970 is to be taken as 105 and the indices for the subsequent years are to be corrected accordingly, what is the approximate value of the agricultural loans in 1980 at 1983 prices?

- A Rs. 570 million
- B Rs. 680 million
- C Rs. 525 million
- D Rs. 440 million

Question 37

Which of the following pairs of years showed the maximum increase in the number of rural bank loans?

- A 1971-72
- B 1974-75
- C 1970-71

D 1980-81

[VIEW SOLUTION](#)

Question 38

From the given data, the number of rural loans up to 1980 formed approximately what percentage of those in 1983?

- A 112%
- B 80%
- C 97%
- D Cannot be determined

[VIEW SOLUTION](#)

Question 39

What is the simple annual rate of increase in the number of agricultural loans from 1970 to 1983?

- A 132%
- B 81%
- C 75%
- D 1056%

[VIEW SOLUTION](#)

Question 40

In which year was the number of rural bank loans per rural bank least?

- A 1974
- B 1971
- C 1970
- D 1975

[VIEW SOLUTION](#)

Question 41

If the consumer price index for 1970 is to be taken as 105 and the indices for the subsequent years are to be corrected accordingly, by roughly how many points do the indices for 1983 and 1975 differ?

- A 174

- B 180
- C 188
- D 195

[VIEW SOLUTION](#)

Question 42

What is the value(in millions) of the agricultural loans in 1983 at 1970 prices?

- A Rs. 326
- B Rs. 264
- C Rs. 305
- D None of these

[VIEW SOLUTION](#)

Question 43

In 1974, the amount of agricultural loans formed what percentage of the total loans?

- A 85%
- B 71%
- C 77%
- D Cannot be determined

Direction for questions: Answer the questions based on the following information. The data given in the table shows the investment details in country 'Fortune Land' of companies A, B, C, D, E and F. Figures in the table are in US dollars in billions.

	A	B	C	D	E	F
year 1	2.5	4.6	5.8	3.11	10.6	7.8
year 2	6.7	7.5	12.5	5.6	17.4	25.3
Year 3	11.5	18.7	21.2	7.7	29.8	60.1

Question 45

For which company is investment not increased from year 1 to year 3?

- A C
- B D
- C F
- D None of these

Question 46

By what percentage is the investments of companies D,E,F greater than the investments of companies A, B, C in year 2?

- A 75%
- B 81%
- C 67.5%
- D 42.3%

[VIEW SOLUTION](#)

Question 47

What is the ratio of investments of E to F for the years 1 to 3?

- A 31 : 19

B 19 : 31

C 20 : 29

D 41 : 53

[VIEW SOLUTION](#)

Question 48

What is the percentage increase in investment of B, C, D and E from year 1 to year 3?

A 121%

B 321%

C 221%

D 300%

Sub-category

The horizontal bars in the above diagram represent 2020 aggregate sales (in ₹ million) of a company for the different subcategories of its products. The top four product subcategories (Bookcases, Chairs, Furnishings, Tables) belong to furniture product category; the bottom four product subcategories (Accessories, Copiers, Machines, Phones) belong to the technology product category while all other product subcategories belong to the office supply product category. For each of the product subcategories, there is a vertical line indicating the sales of the corresponding subcategory in 2019.

Question 58

The improvement index for a category is the maximum percentage increase in sales from 2019 to 2020 among any of its subcategories. The correct order of categories in increasing order of this improvement index is

- A furniture, technology, office supply
- B technology, furniture, office supply
- C office supply, technology, furniture
- D office supply, furniture, technology

 VIDEO SOLUTION

Question 59

The total sales (in ₹ million) in 2019 from products in office supplies category is closest to

- A 18.0
- B 16.5
- C 13.5
- D 12.5

 VIDEO SOLUTION

Question 60

How many subcategories had sales of ₹ 4 million or more in 2019 and registered an increase in sales in excess of 25% in 2020?

 VIDEO SOLUTION

Question 61

The percentage increase in sales in Furniture category from 2019 to 2020 is closest to

- A 20%
- B 8%
- C 25%
- D 1%

Instructions

There are 21 employees working in a division, out of whom 10 are special-skilled employees (SE) and the remaining are regular-skilled employees (RE). During the next five months, the division has to complete five projects every month. Out of the 25 projects, 5 projects are "challenging", while the remaining ones are "standard". Each of the challenging projects has to be completed in different months. Every month, five teams – T1 T2, T3, T4 and T5, work on one project each. T1, T2, T3, T4 and T5 are allotted the challenging project in the first, second, third, fourth and fifth month, respectively. The team assigned the challenging project has one more employee than the rest.

In the first month, T1 has one more SE than T2, T2 has one more SE than T3, T3 has one more SE than T4, and

T4 has one more SE than T5. Between two successive months, the composition of the teams changes as follows:

- The team allotted the challenging project, gets two SE from the team which was allotted the challenging project in the previous month. In exchange, one RE is shifted from the former team to the latter team.
- After the above exchange, if T1 has any SE and T5 has any RE, then one SE is shifted from T1 to T5, and one RE is shifted from T5 to T1. Also, if T2 has any SE and T4 has any RE, then one SE is shifted from T2 to T4, and one RE is shifted from T4 to T2.

Each standard project has a total of 100 credit points, while each challenging project has 200 credit points. The credit points are equally shared between the employees included in that team.

Question 62

Which of the following CANNOT be the total credit points earned by any employee from the projects?

- A 140
- B 150
- C 170
- D 200

There are 21 employees working in a division, out of whom 10 are special-skilled employees (SE) and the remaining are regular-skilled employees (RE). The table below shows the estimated cost (in Rs. Lakh) of a project of laying a railway line between two places.

	1988	1989	1990	1991
Surveying	41.5	7.5	2.2	0.5
Cement	----	95	80	75
Steel	----	70	45	60
Bricks	----	15	12	16
Building materials	----	25	18	21
Labour	2.1	25	20	18
Administration	7.5	15	15	14
Contingencies	1	15	4.2	5
Total	52.1	267.5	196.4	209.5

Question 66

If the cost of materials ((cement, steel, bricks, building materials) rises by 5% each year from 1990 onwards, by how much will the estimated cost rise for the years 1990 and 1991?

- A Rs. 11.45 lakh
- B Rs. 16.35 lakh
- C Rs. 21.45 lakh
- D Rs. 26.45 lakh

The table below shows the estimated cost (in Rs. Lakh) of a project of laying a railway line between two places.

	1988	1989	1990	1991
Surveying	41.5	7.5	2.2	0.5
Cement	—	95	80	75

Directions for the following four questions:

Answer the following questions based on the information given below.

The following table shows the break-up of actual costs incurred by a company in last five years (year 2002 to year 2006) to produce a particular product.

	Year 2002	Year 2003	Year 2004	Year 2005	Year 2006
Volume of production and sale (Units)	1,000	900	1,100	1,200	1,200
Costs (Rs.)					
Material	50,000	45,100	55,200	59,900	60,000
Labour	20,000	18,000	22,100	24,150	24,000
Consumables	2,000	2,200	1,800	1,600	1,400
Rent of building	1,000	1,000	1,100	1,100	1,200
Rates and taxes	400	400	400	400	400
Repair and maintenance expenses	800	820	780	790	800
Operating cost of machines	30,000	27,000	33,500	36,020	36,000
Selling and marketing expenses	5,750	5,800	5,800	5,750	5,800

The production capacity of the company is 2000 units. The selling price for the year 2006 was Rs. 125 per unit. Some costs change almost in direct proportion to the change in volume of production, while others do not follow any obvious pattern of change with respect to the volume of production and hence are considered fixed. Using the information provided for the year 2006 as the basis for projecting the figures for the year 2007, answer the following questions:

Question 72

What is the approximate cost per unit in rupees, if the company produces and sells 1400 units in the year 2007?

The following table shows the break-up of actual costs incurred by a company in last five years (year 2002 to year 2006) to produce a particular product.

	Year 2002	Year 2003	Year 2004	Year 2005	Year 2006
Volume of production and sale (units)	1,000	800	1,200	1,500	1,700
Costs (Rs.)					
Material	50,000	45,000	55,000	60,000	65,000
Labour	20,000	18,000	22,000	24,000	26,000
Consumables	2,000	2,000	1,800	1,800	1,800
Rent of building	1,000	1,000	1	1,100	1,200
Heats and lights	400	400	400	400	400
Repair and maintenance expenses	300	300	300	300	300
Operating cost of machines	10,000	11,000	12,000	13,000	14,000
Selling and marketing expenses	5,750	5,000	5,000	5,000	5,750

The production capacity of the company is 2000 units. The selling price per unit is Rs. 125 per unit. Some costs change almost in direct proportion to the change in volume of production, while others do not. Using the information provided for the year 2006 as the base for proportion, answer the following questions:

What is the approximate cost per unit in rupees, if the company produces and sells 1400 units in the year 2007?

A) 104
B) 110
C) 116

VIDEO SOLUTION

Question 74

Given that the company cannot sell more than 1700 units, and it will have to reduce the price by Rs.5 for all units if it wants to sell more than 1400 units. What is the maximum profit that can be realized provided that the company sells more than 1400 units?

- A 25,400
- B 24,400
- C 31,400
- D 32,900
- E 32,000

Directions for the following four questions:
Answer the following questions based on the information given below.

The following table shows the break-up of actual costs incurred by a company in last five years (year 2002 to year 2006) to produce a particular product.

	Year 2002	Year 2003	Year 2004	Year 2005	Year 2006
Volume of production and sale (units)	1,000	800	1,200	1,500	1,700
Costs (Rs.)					
Material	50,000	45,000	55,000	60,000	65,000
Labour	20,000	18,000	22,000	24,000	26,000
Consumables	2,000	2,000	1,800	1,800	1,800
Rent of building	1,000	1,000	1	1,100	1,200
Heats and lights	400	400	400	400	400
Repair and maintenance expenses	300	300	300	300	300
Operating cost of machines	10,000	11,000	12,000	13,000	14,000
Selling and marketing expenses	5,750	5,000	5,000	5,000	5,750

The production capacity of the company is 2000 units. The selling price per unit is Rs. 125 per unit. Some costs change almost in direct proportion to the change in volume of production, while others do not. Using the information provided for the year 2006 as the base for proportion, answer the following questions:

What is the approximate cost per unit in rupees, if the company produces and sells 1400 units in the year 2007?

A) 104
B) 110
C) 116

VIDEO SOLUTION

Question 75

What is the minimum number of units that the company needs to produce and sell to avoid any loss?

- A 313
- B 350
- C 384
- D 747
- E 928

Directions for the following four questions:
Answer the following questions based on the information given below.

The following table shows the break-up of actual costs incurred by a company in last five years (year 2002 to year 2006) to produce a particular product.

	Year 2002	Year 2003	Year 2004	Year 2005	Year 2006
Volume of production and sale (units)	1,000	900	1,500	1,200	1,400
Costs (Rs.)					
Material	50,000	45,000	80,000	70,000	60,000
Labour	20,000	18,000	22,000	14,000	24,000
Overhead	1,000	2,000	1,800	1,800	1,400
Cost of building	1,000	1,000	1,100	1,100	1,100
Power and steam	400	400	400	400	400
Repairs and maintenance expenses	800	800	800	800	800
Operating cost of machinery	10,000	17,000	10,000	10,000	10,000
Selling and marketing expenses	5,000	5,000	5,000	5,000	5,000

The production capacity of the company is 2000 units. The selling price of the product is Rs. 125 per unit. Some costs change almost in direct proportion to the change in volume of production, while others do not. Some costs change with respect to the volume of production and hence are considered fixed. Using the information provided for the year 2006 as the basis for proportion, answer the following questions:

What is the approximate cost per unit in rupees, if the company produces and sells 1400 units in the year 2007?

A) 304
B) 310
C) 316
D) 322

Explanations

1. **B**

Total investment in year 1995 = $7081.6 + 2923.1 = 10004.7$

Total electricity and thermal investment in year 1995 for both villages = $815.2 + 632.4 + 2065.8 + 1232.7 = 4726.1$

Percentage investment = $\frac{4726.1}{10004.7} \times 100$

Through approximation method, we can say that above value will be less than 50 and more than 47
Hence among all options, B will be most appropriate answer.

[VIEW SOLUTION](#)

2. **A**

Increase in 1996 compared to 1995 for khammam = $8352 - 7081.6 = 1270.4$

With approximation method, we can say that %increase is above 17 and lower than 18.

Hence for 1997 investment will be have an increment of 18% nearly

So in 1997, investment = $8352(1 + \frac{18}{100}) = 9855$ crore (nearly)

[VIEW SOLUTION](#)

3. **B**

In Electricity, the increase in investment is 300, which is less than 15%.

In Chemical, the increase is 241.1, which is greater than 32%.

In Thermal, there was a decrease in investment.

In Solar, the increase is 428.6, which is less than 32%.

In Nuclear, the increase in investment is 507.8, which is less than 31%.

Hence, the investment is the highest in chemical core area.

[VIEW SOLUTION](#)

4. **D**

Total investment in 1996 = $3489.5 + 8352 = 11841.5$

Total investment in 1995 = $7081.6 + 2923.1 = 10004.7$

change = 1836.8

$$\% \text{change} = \frac{1836.8}{10004.7} \times 100$$

As we can see with approximation method that above value will be less than 20 and more than 18
Hence most appropriate answer will be D) = 18

[VIEW SOLUTION](#)

5. **C**

Total investment in chittoor = $2923.1 + 3489.5 = 6412.6$

Total investment in khammam = $7081.6 + 8352 = 15433.6$

Ratio = $15433.6 \div 6412.6 = 2.4$ (nearly)

[VIEW SOLUTION](#)

6. **D**

For the security issued in 4th June 2003, the value of non-competitive bids accepted in the first round is less than that in the second round. Hence option D is not true.

[VIEW SOLUTION](#)

7. **C**

The security issued in June 2003 had lower maturity in 2nd round but no. of bids were more. Hence option C.

[VIEW SOLUTION](#)

8. **B**

Only one security issued in 17 July 2002 was undersubscribed.

[VIEW SOLUTION](#)

9. **A**

In dec 2002, 19 % of all spam mails were from health category and In jun 2003, 18 % of all spam mails were from health category. Now since the total spam mails received in dec 02 were greater than that in jun 03. Number of spam mails in health category in dec 02 will be greater than that in jun 03.

[VIEW SOLUTION](#)

10. **D**

Since we don't know by how much more total spam mails were received in Sep 02 as compared to mar 03 we can't compare the number of spam emails in financial category received in September 2002 as to that in March 2003. Hence option D.

[VIEW SOLUTION](#)

11. **C**

It is clear from the table that for products category the percentage of spam mail is increasing from sep02 to June 03 . But the rate at which it is growing is decreasing. Hence option c .

[VIEW SOLUTION](#)

12. **D**

We can't say anything regarding exports and imports as the value given is export intensity and import intensity . Also statement C is clearly false. And we can infer option D easily from the table.

[VIEW SOLUTION](#)

13. **B**

We know that $\text{Import} / \text{sales} = 14.2$ and $\text{total import} = 20.2 * \text{cost of raw material} + 17.6 * \text{gross fixed assets} = 20.2 * 0.5 * \text{sales} + 17.6 * \text{GFA} = 14.2 * \text{sales}$. Solving this we get $17.6 * \text{GFA} = 4.1 * \text{sales}$. So required value is $17.6 / 4.1 = 4.3$. Hence option B .

[VIEW SOLUTION](#)

14. **A**

We know that growth rate in deficit intensity can be calculated as $\text{GD}i = (\text{DI}i - \text{DI}(i-1)) / \text{DI}(i-1)$, so in year 1994-95 we have $\text{GDI} = (6.3 - 5.1) / 5.1 = \text{max out of all others}$.Hence option A.

[VIEW SOLUTION](#)

15. **D**

We know that highest growth rate in deficit intensity was in the year 94-95 which is equal to $1.2 * 100 / 5.1 = 23.5\%$. hence option D.

[VIEW SOLUTION](#)

CAT Score Calculator

16. **A**

Highest percentage growth in the total IT business, relative to the previous year was achieved in 95-96 which is equal to $(2886 - 2041) / 2041 = 845 / 2041 = 41.4\%$

[VIEW SOLUTION](#)

17. **D**

IT business hardware activity in

$$1995-96 = 1037 + 35 = 1072$$

$$1996-97 = 1050 + 286 = 1336$$

$$1997-98 = 1205 + 201 = 1406$$

$$1998-99 = 1026 + 4 = 1030$$

We clearly see from the table that for IT hardware business activity 1996-97 dominates 1998-99. Hence option D is false.

[VIEW SOLUTION](#)

18. **B**

Total annual exports lay of the total annual business of the IT industry in 96-97 can be given as $1383/3807 = 0.36 = 36\%$ also total annual exports lay of the total annual business of the IT industry in 97-98 can be given as $1970/5031 = 0.39 = 39\%$. Hence option b.

[VIEW SOLUTION](#)

19. C

We can clearly see that option A and B are false. Also after adding we can verify that IT business in training during 1994- 1999 was higher than the total IT business in maintenance during the same period.

IT Training = $107+143+185+263+302 = 1000$

IT Maintanence = $142+172+182+221+236 = 953$

Hence option C.

[VIEW SOLUTION](#)

20. D

Hardware in 96-97 = $1050 + 286 = 1336$

Hardware in 95-96 = $1037 + 35 = 1072$

Peripherals in 96-97 = 195

Peripherals in 95-96 = 202

So, hardware dominates in 96-97 compared to 95-96 but the same is not true for peripherals. Thus, 96-97 cannot be said to dominate 95-96. Thus, A is not true.

The same is the case for options B and C. Thus, D is the right choice.

[VIEW SOLUTION](#)

21. D

The per capita of each of the following years is given below.

1984-85 is Rs. 3,098

1985-86 is Rs. 3,482

1986-87 is Rs. 3,786

1987-88 is Rs. 4,203

1988-89 is Rs. 4,857

1989-90 is Rs. 5,319

Hence, the percapita income is highest for the year 1989-90

[VIEW SOLUTION](#)

22. D

The per capita of each of the following years is given below.

1984-85 is Rs. 3,098

1985-86 is Rs. 3,482 (increased by Rs. 384)

1986-87 is Rs. 3,786 (increased by Rs. 304)

1987-88 is Rs. 4,203 (increased by Rs. 416)

1988-89 is Rs. 4,857 (increased by Rs. 653)

1989-90 is Rs. 5,339 (increased by Rs. 481)

Hence, the increase is highest for the year 1988-89

[VIEW SOLUTION](#)

23. **D**

The per capita of each of the following years is given below.

1984-85 is Rs. 3,098

1985-86 is Rs. 3,482 (increased by 12.42%)

1986-87 is Rs. 3,786 (increased by 8.73%)

1987-88 is Rs. 4,203 (increased by 11.00%)

1988-89 is Rs. 4,857 (increased by 15.55%)

1989-90 is Rs. 5,339 (increased by 9.92%)

The percentage increase in population over the years is fairly constant and varied between 1% and 2%. But the percentage increase in GDP per capita in the year 1988-89 is significantly higher. Hence, the correct answer is 1988-89

[VIEW SOLUTION](#)

24. **A**

The population increase for the year 1985-86 from the year 1984-85 is just one crore.

In every other year, the population increase was either 1.5 crore or 2 crores.

Note that the denominators for each of the years (ie total population) is fairly same.

Hence, the correct answer is 1985-86

[VIEW SOLUTION](#)

25. **B**

For increment in 1986-87, denominator is increased by 2 whereas in every other year it is either increased by 1 or 1.5

Since numerator has increased by 30, which is similar to that of other years, we can say lowest increment occur in the year 1986-1987.

[VIEW SOLUTION](#)

5000+ CAT Questions

Cracku CAT Questions

26. **C**

For the above answer, the ratio of number of rooms to the cost should be maximum. It is maximum for lokhandwala group which is $536/225 = 2.38$

[VIEW SOLUTION](#)

27. **A**

The cost per room equals (total cost)/(total rooms)

To calculate the least cost per room, we have to only check IHCL and Lokhandwala Group. A simple inspection will remove all other companies as they have more cost and lesser rooms than either of the two.

Cost per room of IHCL = $275/600 = 45.83$ lakhs

Cost per room of Lokhandwala = $225/536 = 41.97$ lakhs.

Hence, the cost per room is least for Lokhandwala Group.

[VIEW SOLUTION](#)

28. C

Total cost in 1997 = 250 + 225 = 475 Crores.

These projects were completed in 1998 => Interest for 1 year must be added to the cost.

$$\text{Interest} = \frac{475 \times 1 \times 10}{100} = 47.5 \text{ Crores}$$

Total Amount = 475 + 47.5 = 522.5 Crores.

[VIEW SOLUTION](#)

29. A

All the projects are completed by 2000. Hence, we need to add the costs of all the projects.

On adding all the costs we get Rs 1785 Crores.

[VIEW SOLUTION](#)

30. A

Total cost of projects that were completed in 1999 is 275 + 235 + 250 + 300 = Rs 1060 Crores.

Interest for 2 years must also be added to this cost => $1060(1 + (0.1))^2 = 1060 \times 1.21 = \text{Rs } 1282.6 \text{ Crores}$

[VIEW SOLUTION](#)

CAT Daily Targets

Step by step, heading towards 99+ percentile

31. D

In this data, all the tariff rates are given. The table does not mention the consumption of electricity in any of the given years. Hence the consumption cannot be determined.

[VIEW SOLUTION](#)

32. A

$$\text{Average tariff in Sector 1 in 1994-95} = \frac{425+472+420+415+440}{5} = 434.4 \text{ P/kWh}$$

$$\text{Average tariff in Sector 1 in 1991-92} = \frac{\frac{425}{1.15} + \frac{472}{1.05} + \frac{420}{0.96} + \frac{415}{1.08} + \frac{440}{1.1}}{5} = 408.4 \text{ P/kWh}$$

$$\text{Change} = 434.4 - 408.4 = 26 \text{ P/kWh}$$

$$\% \text{ Change} = \frac{26}{408.4} \times 100 = 6.5\%$$

[VIEW SOLUTION](#)

33. B

$$\text{Average tariff in region 4} = \frac{415+423+441+451}{4} = \frac{1730}{4} = 432.5 \text{ p/kWh} \Rightarrow \text{A is wrong.}$$

In all the four sectors, tariff in region 2 is higher than tariff in region 5.

=> Average tariff in region 2 is higher than average tariff in region 5 => Option B is correct.

[VIEW SOLUTION](#)

34. D

As we do not know the population of the urban sector and its usage of current, we cannot determine the total cost.

[VIEW SOLUTION](#)

35. B

Average tariff in sector 3 = $(428/1.08 + 478/.96 + 432/1.06 + 441/1.1 + 439/1.08)/5 = 421.8 \sim 420$

[VIEW SOLUTION](#)

36. A

Since the consumer price indices for all years change, the ratios will remain the same as before.

Value of the agricultural loans in 1980 at 1983 prices = $498.4 * 149 / 131 = 570$ approx.

[VIEW SOLUTION](#)

37. D

Number of loans in 1970 = $90 * 28 = 2520$

Number of loans in 1971 = $115 * 39 = 4485$

Number of loans in 1972 = $130 * 52 = 6760$

Number of loans in 1974 = $260 * 98 = 25480$

Number of loans in 1975 = $318 * 121 = 38478$

Number of loans in 1980 = $605 * 288 = 174240$

Number of loans in 1981 = $665 * 312 = 207480$

So, the maximum increase in number of loans is in 1980 - 81

[VIEW SOLUTION](#)

38. B

Number of loans in 1970 = $90 * 28 = 2520$

Number of loans in 1971 = $115 * 39 = 4485$

Number of loans in 1972 = $130 * 52 = 6760$

Number of loans in 1974 = $260 * 98 = 25480$

Number of loans in 1975 = $318 * 121 = 38478$

Number of loans in 1980 = $605 * 288 = 174240$

Sum of these loans = 251963

Number of loans in 1983 = $840 * 380 = 319200$

Ratio = $\frac{251963}{319200} = 80\%$ approximately.

[VIEW SOLUTION](#)

39. B

Change = $211.6 - 18.3 = 193.3$

% increase = $\frac{193.3}{18.3} * 100 = 1056\%$

This is distributed over 13 years $\Rightarrow$ Average yearly increment = $\frac{1056}{13} = 81\%$

[VIEW SOLUTION](#)

40. C

The second column in the rural bank loans gives us the average number of loans, which is same as the number of rural bank loans per rural bank.

This field is least in 1970.

Hence, 1970 is the answer.

[VIEW SOLUTION](#)

41. A

Difference between CPI of 1983 and 1975 = $149 - 78 = 71$

If CPI of 1970, which is 43, is changed to 105, then the value of 71 changes to $\frac{105}{43} * 71 = 174$

[VIEW SOLUTION](#)

42. B

To change the prices from one year to another year, we have to use the Consumer Price Index.

Value in 1983 = 915.7 millions

CPI in 1983 = 149

CPI in 1970 = 43

Required value in 1970 = $\frac{43}{149} * 915.7 = \text{Rs } 264 \text{ million}$

[VIEW SOLUTION](#)

43. A

Total loan from rural in 1974 = $260 \times 98 \times 243 = 6 \text{ million (nearly)}$

Loan for agriculture in 1974 = 34.5 million

Total = $34.5 + 6 = 40.5$

%Agriculture loan = $\frac{34.5}{40.5} \times 100 = 85\% \text{ (Nearly)}$

[VIEW SOLUTION](#)

44. B

64.75% population is below 35 years age.

The number of people aged below 35 years is 400 million.

So total number of people are, suppose $x = \frac{400 \times 100}{64.75}$

Now below 15 years of age we have $f/m = 0.96$ so $f = (m+f)*0.96/1.96$ and $m+f = 30*400/64.75$

Solving we get, $f = 30*400*0.96/(64.75*1.96) = 90.8$

Hence option B .

[VIEW SOLUTION](#)

45. D

Investment has increased for all the companies.

[VIEW SOLUTION](#)

46. B

Investments of A, B and C = $6.7 + 7.5 + 12.5 = 26.7$

Investments of A, B and C = $5.6 + 17.4 + 25.3 = 48.3$

Difference = 21.6

% difference = $\frac{21.6}{26.7} * 100 = 80.8\%$

[VIEW SOLUTION](#)

47. B

Total investment of E = 57.8 Billion

Total investment of F = 93.2 Billion

Ratio = $57.8 : 93.2 = 19:31$

[VIEW SOLUTION](#)

48. C

Total investment by B, C, D and E in year 1 = 24.11 Billion

Total investment by B, C, D and E in year 3 = 77.4 Billion

Increase = $77.4 - 24.11 = 53.29$ Billion

% Increase = $\frac{53.29}{24.11} * 100 = 221\%$

[VIEW SOLUTION](#)

49. C

Total contribution in year 2 = $6.7 + 7.5 + 12.5 + 5.6 + 17.4 + 25.3 = 75$ billion

Contribution by D in year 2 = 5.6

% contribution by D = $\frac{5.6}{75} * 100 = 7.4\%$

[VIEW SOLUTION](#)

50. D

Efficiency = $\frac{\text{revenue}}{\text{expenses}}$

In 2000, except Rest of the world, all the other operation have an efficiency of greater than 1.

Efficiency of Rest of the Worls = $\frac{20}{33}$, which is the least.

100+ CAT Quant Questions

51. B

$$\text{Profitability} = \frac{\text{Net Income After Taxes}}{\text{Expenses}}$$

In 2000, Spain had the best profitability of 225/43.

Hence option B.

[VIEW SOLUTION](#)

52. B

There are 4 such operations - North Africa & Middle East, Argentina, Rest of Latin America and Far East - that registered a sustained yearly increase in income before taxes and charges from 1998 to 2000.

[VIEW SOLUTION](#)

53. B

Spain and rest of latin america has witnessed more than 200% increase in revenue from 1999 to 2000 for the company.

[VIEW SOLUTION](#)

54. D

In 1998, the efficiency in Rest of Latin America was $\frac{34}{57}$.

In 1998, the efficiency in Rest of the world was $\frac{5}{15}$, which is less than $\frac{34}{57}$.

Hence, the efficiency of rest of latin america was not the least.

[VIEW SOLUTION](#)

55. C

5% of total revenue in the year 1999 is 168.7 . Manually counting number of countries where the revenue is less than 168.7, we see that 4 countries have revenue less than 168.7

[VIEW SOLUTION](#)

100+ CAT DILR Questions

56. B

Profitability for the North Sea operations in 1998 was 20/52 and in the year 1999 was 54/65 . Hence we can clearly see that the profitability increased. hence option B.

[VIEW SOLUTION](#)

57. B

Percentage increase in net income before tax and charges for total world (1998-99)

$$= \frac{1375-248}{248} * 100 = 454.4\%$$

Spain is making loss.

Percentage increase for North Africa and Middle-East = $\frac{341-111}{111} * 100 = 207.2\%$

Percentage increase for Argentina = $\frac{838-94}{94} * 100 = 791.5\%$

From the table one can directly say that there is no operation other than Argentina, whose percentage increase in net income before taxes and charges is higher than the average (world).

 [VIEW SOLUTION](#)

58. A

The improvement index for a category is the maximum percentage increase in sales from 2019 to 2020 among any of its subcategories.

Hence based on the information provided in the tabular data we need to look for the different subcategories where the rise in sales from 2019 to 2020 is higher.

Based on the visual data :

In the furniture category :

Bookcases and Chairs have a relatively high percentage increase :

Books cases: 1.9 million to 2.2 million (15.7 percent increase)

Chairs: 6.2 million to 7 million (12.9 percent increase)

In the office supply category :

Binders and Appliances have a relatively high percentage increase :

Binders: 3.6 million to 5.3 million (47 percent increase)

Appliances: 1.9 million to 3.15 million (65.7 percent increase)

In technology product category :

Accessories: 3.1 to 4.4 million. (41.9 percent increase)

Phones: 5.8 million to 7.7 million (32.7 percent increase)

Hence among the categories :

The highest increase among them is in the order :

Furniture < Technology product < office supply.

 [VIDEO SOLUTION](#)

59. C

The total sales from products in the office supply category in 2019 is :

Sum of sales of :

Binders: 3.6 million

Art : 0.4 million.

Appliances: 1.9 million

Envelops: 0.3 million

Fasteners: 0.1 million

Labels: 0.2 million

Paper = 1.5 million.

Storage: 4.3 million.

Supplies: 1.1 million.

The sum of sales of these products = $3.6+0.4+1.9+0.3+0.1+0.2+1.5+4.3+1.1 = 13.4$ million.

The closest among the option is 13.5 million.

 VIDEO SOLUTION

60. 1

The number of subcategories had sales of ₹ 4 million or more in 2019 and registered an increase in sales in excess of 25% in 2020 :

The subcategories with more than 4 million in sales in 2019 are :

Chairs: 6.2 million in 2019 and 7 million in 2020. (For a 25 percent increase the sales must be at least 7.8 million and hence fails)

Tables: 4.4 million in 2019 and 4.5 million in 2020. (For a 25 percent increase the sales must be at least 5.5 million and hence fails)

Storage: 4.3 million sales in 2019 and 5.1 million in 2020. (For a 25 percent increase the sales must be at least 5.4 and hence fails)

Phones: 5.75 million in 2019 and 7.5 million in 2020. (An increase of 30.5 percent)

Hence only one subcategory satisfies the condition.

 VIDEO SOLUTION

100+ CAT VARC Questions

61. B

The percentage increase in sales in the furniture category from 2019 to 2020 are :

Bookcases: 1.9 million in 2019 and 2.2 million in 2020.

Chairs: 6.2 million in 2019 and 7 million in 2020.

Furnishings: 2.05 million in 2019 and 2.1 million in 2020.

Tables: 4.4 million in 2019 and 4.5 million in 2020.

Hence the percentage increase is given by :

$$\frac{((2.2+7+2.1+4.5)-(1.9+6.2+2.05+4.4))}{1.9+6.2+2.05+4.4} \cdot 100 = \frac{125}{14.55} = 8.53\%$$

 VIDEO SOLUTION

62. B

When challenging project is given, each employee gets 40 points.

When standard project is given, each employee gets 25 points.

Suppose:

If a particular employee is involved in all standard projects then his credit points will be: 125

If a particular employee is involved in 4 standard projects and 1 challenging project then his credit points will be: 140

If a particular employee is involved in 3 standard projects and 2 challenging projects then his credit points will be: 155

If a particular employee is involved in 2 standard projects and 3 challenging projects then his credit points will be: 170

If a particular employee is involved in 1 standard project and 4 challenging projects then his credit points will be: 185

If a particular employee is all challenging projects then his credit points will be: 200

Hence, an employee cannot earn 150 points.

 VIDEO SOLUTION

Refer to table of Month 3, the number of SE employees in T1 and T5 are respectively (0,2)

 VIDEO SOLUTION

65. D

Check option A,

It is possible to move to T2 after working in T1 for the first month. From T2, either movement to T3 or T4 is possible. If moved to T3, then in next month he can move to T4, because of challenging project. Hence this option can be true.

Check option B,

It is possible to move to T2 after working in T1 for the first month. From T2, either movement to T3 or T4 is possible. If moved to T4, next movement can be in T5. Hence this option can be true.

Check option C,

T2, T3, T4, T5. This sequential movement is also possible.

Check option D,

If Aneek is there in T1 for the first month, then he will shift to T2, T5 or remain in T1 in the subsequent month.

Consider he remained in T1, then he will either move to T5 or remain in T1. So, if this happens the sequence given in option can never follow.

Suppose he has shifted to T2, but T2 is not mentioned in option, so ruled out.

And if he moved to T5, in the next month then he will remain there only.

Hence option D is not correct.

CAT Expected Questions PDF

cracku

66. B

In the year 1990, total increment will be $4+2.25+0.6+0.9 = 7.75$

And in the year 1991, total increment be $3.75+3+0.8+1.05=8.60$

Hence total increase in estimated cost will be = 16.35 Lakhs

[VIDEO SOLUTION](#)

67. B

	1988	1989	1990	1991	
Cements	-	95	80	75	
Steel	-	70	45	60	
Bricks	-	15	12	16	
Building Materials	-	25	18	21	
Labour	2.1	25	20	18	
Total	2.1	230	175	190	=597.1

Till third year expense was 407.1 and total expenditure is 597.1

So ratio will be $\frac{407.1}{597.1} = 0.7$

That will be fraction of length which is supposed to be completed by third year

[VIDEO SOLUTION](#)

68. A

Total estimated cost before increment = $52.1+267.5+196.4+209.5 = 725.5$

Increment in contingencies will be = 25.2

Hence, total estimated cost will also be increased with the same amount.

So percentage increment in total estimated cost will be = $\frac{25.2}{725.5} \times 100 = 3.47$

[VIDEO SOLUTION](#)

69. B

It is said that till 1990, all estimated cost has been spent i.e. 725.5

Then 209.5 is spent in the year 1991. Hence, that will be exceeding the cost.

So percentage increase will be = $\frac{209.5}{725.5} \times 100 = 29$

[VIDEO SOLUTION](#)

70. B

	1988	1989	1990	1991	
Cements	-	95	80	75	=250
Steel	-	70	45	60	=175
Bricks	-	15	12	16	=43
Other Building Materials	-	25	18	21	=64
Labour	2.1	25	20	18	=65.1
Total	2.1	230	175	190	=597.1

Total material for all the years will be = $250+175+43+64 = 532$

Total labour cost for all the years = 65.1

Hence ratio will be $\frac{65.1}{532}$ nearly equal to 8:1.

 VIDEO SOLUTION

71. C

Total expenditure is = $52.1 + 267.5 + 196.4 + 209.5 = 725.5$

So 25.5 will be cut off on administration equally in all years.

Hence in 1989 cut off will be $\frac{25.5}{4} = 6.375$

Percentage cut off will be = $\frac{6.375}{15} \times 100 = 42.5$

 VIDEO SOLUTION

72. B

Fixed costs in 2006 are consumables, rent of building, rates and taxes, repair and maintenance expenses and selling and marketing expenses. We can see this from the trend followed in the years 2002-2006.

Fixed costs in 2006 = $1400 + 1200 + 400 + 800 + 5800 = 9600$

We can see that that material, labour and operation costs depend on no. of units.

If we take units = x .

Total cost of these 3 materials is $50x + 20x + 30x = 100x$ and remaining fixed cost taking same as in 2006 we get, $9600 + 100x$, but here $x = 1400$.

We have total cost per unit $(9600 + 100 \times 1400) / 1400 = 107$ (approx).

Hence option B.

 VIDEO SOLUTION

73. E

Fixed costs in 2006 are consumables, rent of building, rates and taxes, repair and maintenance expenses and selling and marketing expenses. We can see this from the trend followed in the years 2002-2006.

Fixed costs in 2006 = $1400 + 1200 + 400 + 800 + 5800 = 9600$ => fixed costs in 2007 are same.

We can see that that material, labour and operation costs depend on no. of units.

If we take units = x .

Total cost of these 3 materials is $50x + 20x + 30x = 100x$ and remaining fixed cost taking same as in 2006 we get, $9600 + 100x$.

Selling price is reduced by 5% $\Rightarrow$ $SP = 125 * 0.95 = \text{Rs } 118.75$

Profit = $118.75x - 100x - 9600 = 18.75x - 9600$

Profit will be maximum when x is maximum

$\Rightarrow$ 2000 units.

 VIDEO SOLUTION

74. B

Fixed costs in 2006 are consumables, rent of building, rates and taxes, repair and maintenance expenses and selling and marketing expenses. We can see this from the trend followed in the years 2002-2006.

Fixed costs in 2006 = $1400 + 1200 + 400 + 800 + 5800 = 9600 \Rightarrow$ fixed costs in 2007 are same.

We can see that that material, labour and operation costs depend on no. of units.

If we take units = x.

Total cost of these 3 materials is $50x + 20x + 30x = 100x$ and remaining fixed cost taking same as in 2006 we get, $9600 + 100x$.

Selling price = $125 - 5 = \text{Rs } 120$.

Profit = $120x - 100x - 9600 = 20x - 9600$

When $x = 1700 \Rightarrow$ Profit = $20 * 1700 - 9600 = 34000 - 9600 = \text{Rs } 24400$.

 VIDEO SOLUTION

75. C

Fixed costs in 2006 are consumables, rent of building, rates and taxes, repair and maintenance expenses and selling and marketing expenses. We can see this from the trend followed in the years 2002-2006.

Fixed costs in 2006 = $1400 + 1200 + 400 + 800 + 5800 = 9600 \Rightarrow$ fixed costs in 2007 are same.

We can see that that material, labour and operation costs depend on no. of units.

If we take units = x.

Total cost of these 3 materials is $50x + 20x + 30x = 100x$ and remaining fixed cost taking same as in 2006 we get, $9600 + 100x$.

As the selling price is 125, we have $100x + 9600 < 125 * x$.

Solving this we get $x = 384$.

Hence option C.
